

Governor Cuomo wants to expand abortion in New York State.

We are a broad coalition of men and women united in believing that New York needs to reduce abortion, not expand it.

More abortion will not promote women's health or dignity.

We believe in providing real options for those faced with an unplanned pregnancy.

The Top 10 Reasons to Oppose the Abortion Expansion Bill

10. It moves New York State in the opposite direction of "safe, legal and rare."
9. It would undermine beneficial maternity and prenatal care programs, which could be deemed "discriminatory" for favoring childbirth over abortion.
8. It could be used to compel Catholic Charities and Catholic schools to counsel and refer for abortion.
7. It could be used to compel all hospitals, even Catholic hospitals, to allow abortions on premises.
6. It makes abortion immune to prudent regulations supported by large majorities of the public: parental notification for minors' abortions, restrictions on taxpayer funding, informed consent or a waiting period for pregnant women.
5. By inserting a broad "health" exception into our law, it opens up third-trimester abortions for any reason at all, leading to more late-term abortions of viable, fully formed infants.
4. By repealing the requirement in current law that only a licensed physician may perform an abortion, it endangers women's lives.
3. By tying the abortion expansion plan to helping victims of domestic violence and ending pregnancy discrimination in the workplace, these important objectives are held hostage to an illogical and ideological agenda.
2. It will not foster women's health or dignity or promote women's equality.
1. It defies common sense because New York is already the abortion capital of the nation, with 33% of pregnancies ending in abortion, 40% in New York City.
